

Appl. No. 10/050,520
Amdt. A, dated Dec. 17, 2003
Reply to Office Action of Dec. 9, 2003

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

Claims 1-58 (canceled)

59. (new): In a reminder device, the device comprising:

- a. a cylindrical container having an exterior side surface;
- b. a deformable sheet continuous loop member mounted around said exterior side surface of said container, said mounted loop member rotatable to each of a plurality of selected positions.

60. (new): A device as in claim 59 wherein said loop member defines a structural area for engagement.

61. (new): A device as in claim 59 and further comprising a band support member.

62. (new): A device as in claim 59 and further comprising a band support member, said band support member having means for attachment to said container.

63. (new): A device as in claim 59 and further comprising a band support member, said band support member defining a structural area adapted to receive engagement therewith said loop member.

64. (new): A device as in claim 59 and further including co-operating indicia.

65. (new): A device as in claim 59 and further including co-operating indicia which include an arrangement of times co-operating with a pointer adapted to point to any one of said times.

66. (new): A device as in claim 59 wherein indicia may be further inscribed.

67. (new): A device as in claim 59 further comprising a band support member adhesively attached to said container.

68. (new): A device as in claim 59 wherein said loop member includes an adhesive.

69. (new): A device as in claim 59 wherein said loop member further has gripping means to aid grasping said loop for displacement.

70. (new): A device as in claim 59 and further comprising a band support member, said band support member having anti-displacement means for limiting displacement of said loop member.

Appl. No. 10/050,520
Amdt. A, dated Dec. 17, 2003
Reply to Office Action of Dec. 9, 2003

71. (new): A device as in claim 59 and further including a prescription label.
72. (new): In a reminder device, the device comprising:
 - a. a cylindrical container having an exterior side surface;
 - b. a deformable sheet adhesively forming a continuous loop member;
 - c. said continuous loop member retained on said container and said continuous loop member movable to each of a plurality of selected positions.
73. (new): A device as in claim 72 wherein said loop member defines a structural area for engagement.
74. (new): A device as in claim 72 and further comprising a band support member.
75. (new): A device as in claim 72 and further comprising a band support member, said band support member having means for attachment to said container.
76. (new): A device as in claim 72 and further comprising a band support member, said band support member defining a structural area adapted to receive engagement therewith said loop member.
77. (new): A device as in claim 72 and further including co-operating indicia.
78. (new): A device as in claim 72 and further including co-operating indicia which include an arrangement of times co-operating with a pointer adapted to point to any one of said times.
79. (new): A device as in claim 72 wherein indicia may be further inscribed.
80. (new): A device as in claim 72 further comprising a band support member adhesively attached to said container.
81. (new): A device as in claim 72 wherein said loop member further has gripping means to aid grasping said loop for displacement.
82. (new): A device as in claim 72 and further comprising a band support member, said band support member having anti-displacement means for limiting displacement of said loop member.
83. (new): A device as in claim 72 and further including a prescription label.
